The **EtherFlyer.com** exchange is a decentralized Ethereum-based exchange and is therefore slightly different in usage than centralized exchanges, generally speaking, EtherFlyer Exchange is more convenient.

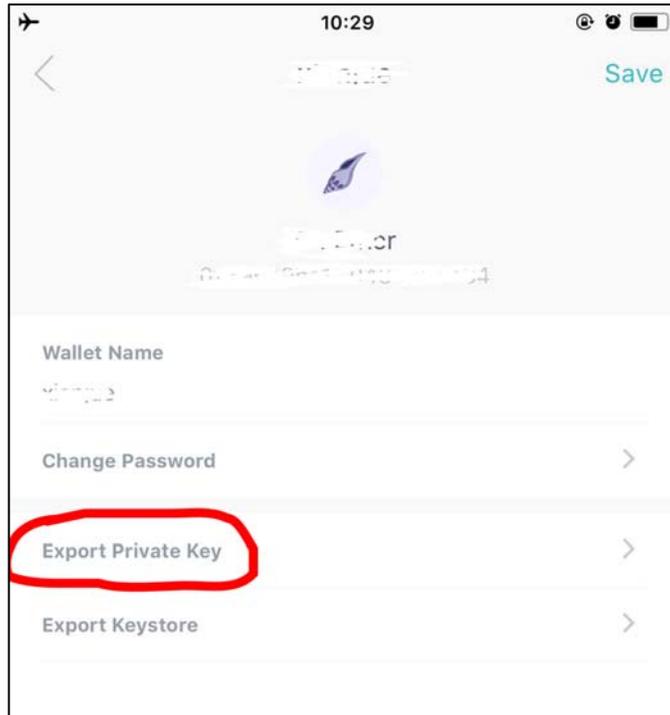

1. Create an imToken Wallet

Suggestion: Create a new wallet on the imToken APP, and then import the wallet into EtherFlyer. In this way, the user can conveniently view the number of tokens in the wallet without worry about the storage of private key.

Create a new imToken wallet: "Profile" -> "Manage wallets" -> "Create" -> enter the password and other related information to create a wallet.

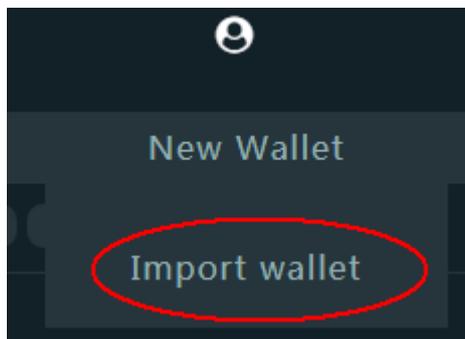

Export imToken wallet private key: "Profile" -> "Manage wallets" -> click the wallet -> "Export Private Key."

2. Import Wallet to EtherFlyer

Click the avatar of <https://EtherFlyer.com> page in the upper right corner, from the drop-down menu, select "Import wallet".

Enter the wallet address, private key and password, click "Import wallet", you can log in EtherFlyer wallet account.

Warning: Do not sent private key in Line, WeChat and any other chat APPs.

Note: **EtherFlyer Server won't save any users password and private key.** No one can help you get back tokens if you lose your private key, include EtherFlyer official.

Import into your Wallet ✕

ETHERFLYER IS A DECENTRALIZED EXCHANGE BUILT ON ETHEREUM

Please enter your wallet address

Please enter your wallet private key

Passwords must be at least 8 characters

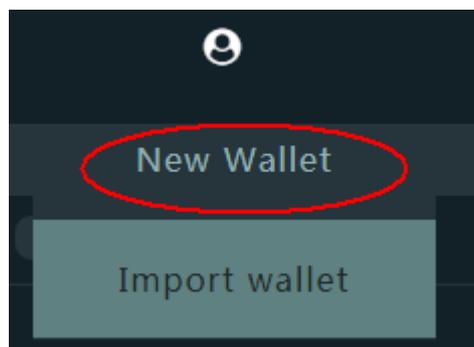

Repeat wallet password

Import wallet

Another way

1. Create an EtherFlyer Wallet

You can also create a wallet account directly on the EtherFlyer page, click the avatar in the upper right corner of the <https://EtherFlyer.com> page, a drop-down menu appears and select "Create wallet".

After entering the password and verification code, click "Create wallet" to create the wallet.

Create your EtherFlyer Wallet

WELCOME TO ETHERFLYER
It Is A Decentralized Exchange Built On Ethereum

Passwords must be at least 8 characters

Repeat wallet password

Please enter verification code. 793K Refresh

Create wallet

Be sure to remember the password, save the wallet address and private key, especially the **private key**, EtherFlyer server won't save any user's password and private key, if the user lost the private key, then no one can help you get the Tokens back, include EtherFlyer Official.

The wallet is created successfully

You just created an Etherflyer account:
[Redacted Address]

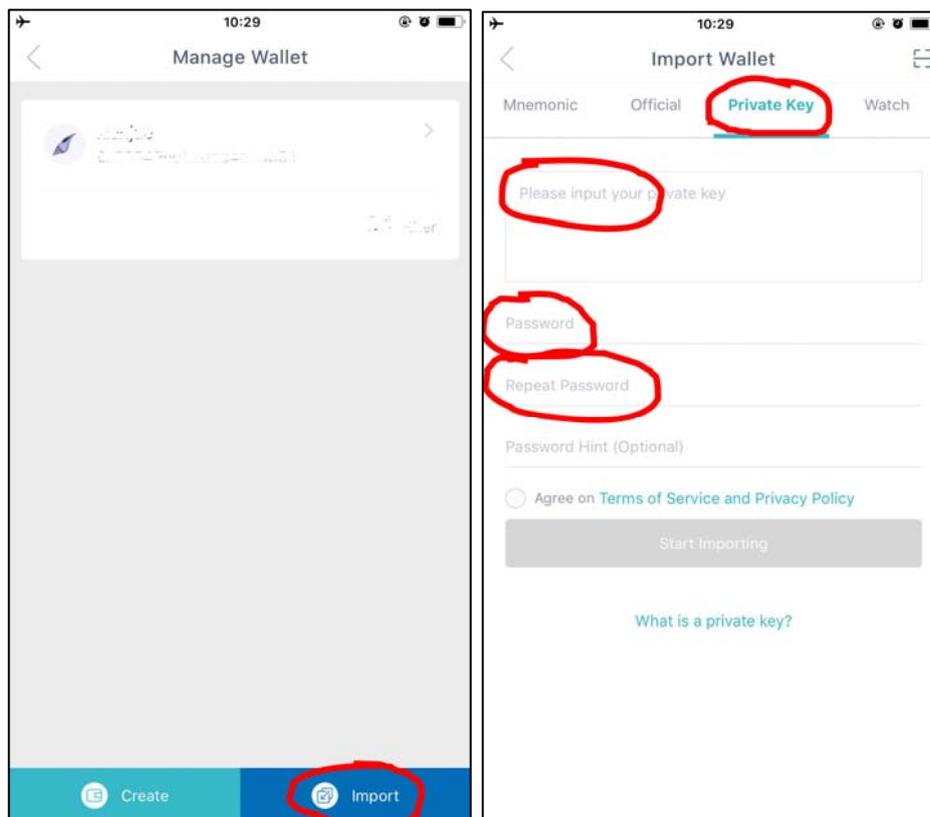

Please BACKUP the private key for this account:
[Redacted Private Key]

OK

2. Verify and Save Private Key in imToken

After create wallet account, it is best to import the wallet private key to the imToken app to both validity and save private key.

imToken import wallet private key: "Profile" -> "Manage wallets" -> "Import" -> "Private Key" -> enter the password and other related information into the wallet.

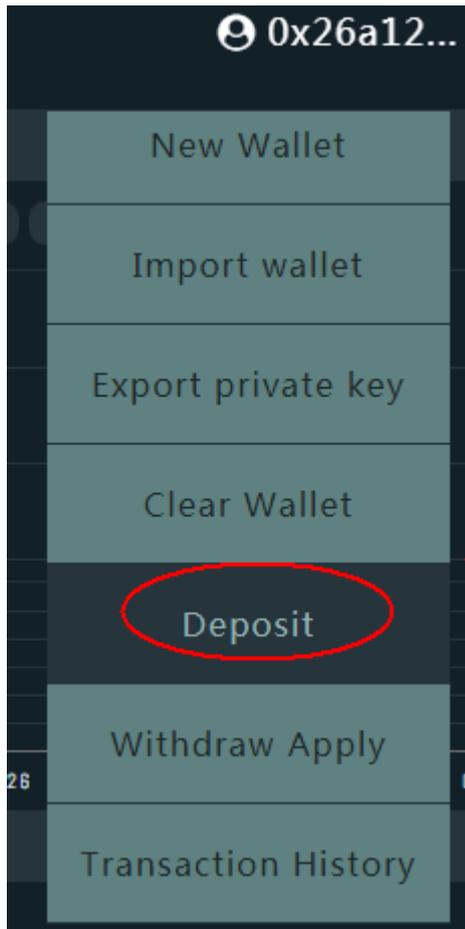

3. Send ETH or Tokens to Wallet Account

You can skip this step if you have ETH and tokens in your wallet account.
If there is no ETH or token in your wallet account, ETH or tokens needs to be sent from another wallet to this one

4. Deposit ETH or Tokens to EtherFlyer Smart Contract

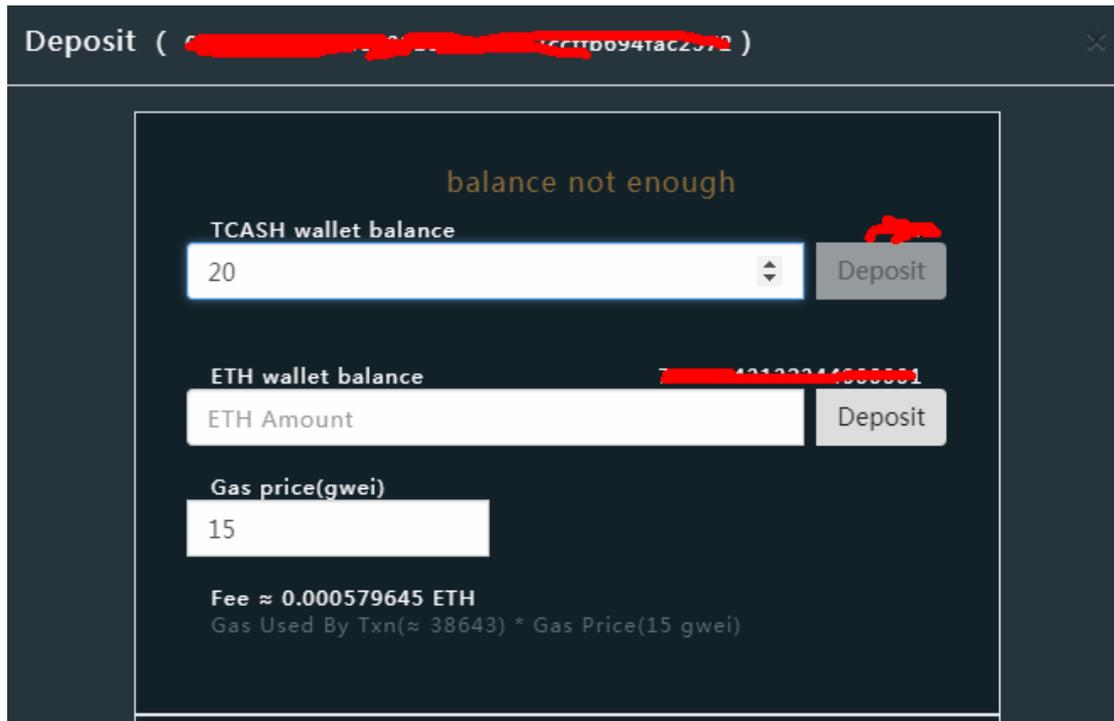

Since the EtherFlyer exchange is a decentralized exchange based on Ethereum's smart contracts and the trading process takes place in smart contracts, users need to deposit ETH or tokens into EtherFlyer smart contracts firstly.

Click the Account Avatar on the "TCASH-ETH" trading page and click "deposit".

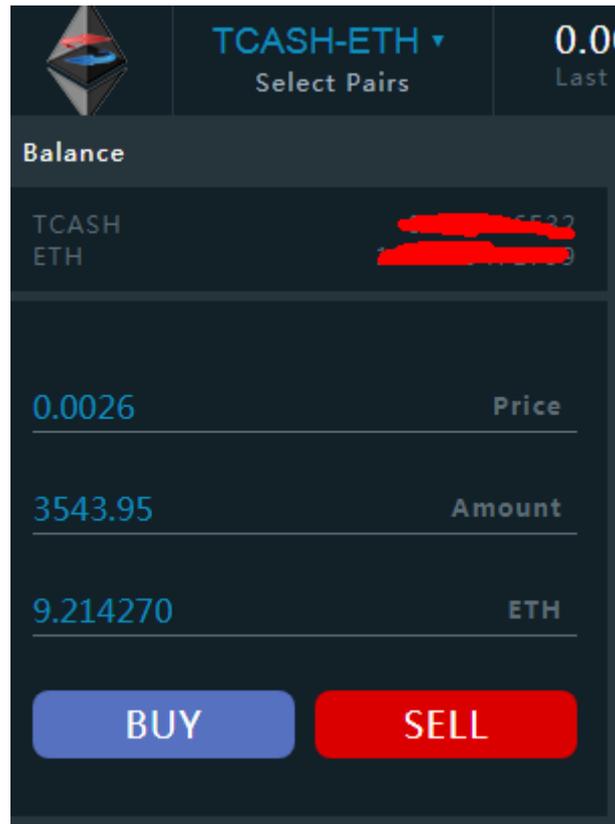

Fill number of TCASH tokens or ETH in the pop-up page, click "Deposit". Here, the value of Gas can be set according to the current situation of Ethereum network.

If you need to deposit other tokens, you need to switch to the token trading interface first, and then click the account avatar and click "Deposit". (the account needs a small amount of ETH as GAS)

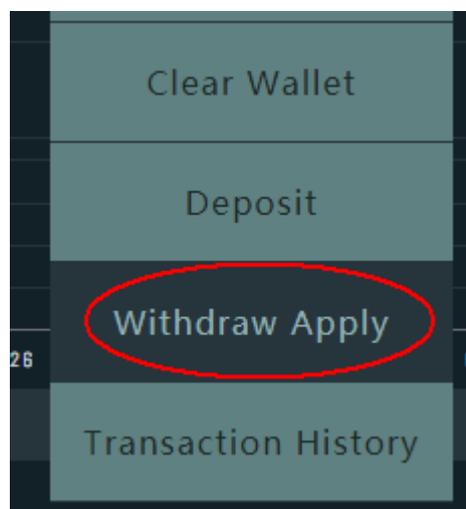

5. Trading

Fill price and amount and click "buy" or "sell" for trading. (Account needs a small amount of ETH for trading)

6. Withdraw Apply from EtherFlyer Smart Contract

If you want to withdraw ETH and tokens from the EtherFlyer smart contract, you need to click the account avatar, and then click "Withdraw apply".

Fill in the pop-up page click "Withdraw apply"

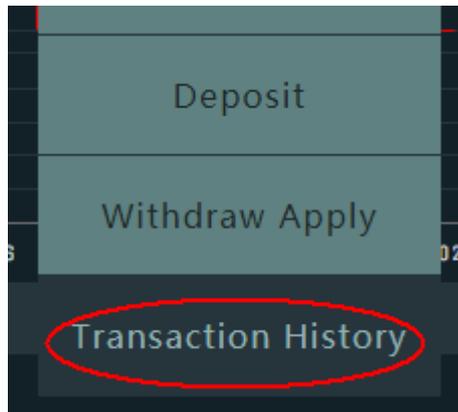

If you need to extract other tokens, you need to switch to the tokens trading interface, and then click on the account avatar, click on "Apply for bills."

The screenshot shows a dark-themed pop-up window titled "Withdraw Apply ([redacted])". It contains the following elements:

- TCASH etherflyer balance:** A dropdown menu with "2000" selected and a "Withdraw Apply" button to its right. The balance value is [redacted].
- ETH etherflyer balance:** A text input field with "ETH Amount" and a "Withdraw Apply" button to its right. The balance value is [redacted].
- Gas price(gwei):** A text input field containing the value "100".
- Fee calculation:** Text indicating "Fee ≈ 0.005391600 ETH" and "Gas Used By Txn(≈ 53916) * Gas Price(100 gwei)".

7. Confirm Withdraw

Click the account avatar, and then click "Transaction History", you can view the status of the relevant records.

In the pop-up page, if the status is displayed as "REQUESTING", the user can cancel the withdrawal application.

WITHDRAW	ETH	100	REQUESTING	withdrawCancel
WITHDRAW	ETH	100	REQUESTING	withdrawCancel
WITHDRAW	ETH	600	REQUESTING	withdrawCancel

If the status is "APPROVED", the user clicks "withdraw apply" and the token will be sent directly to the user's wallet address.

DEPOSIT	TCASH	1000	COMPLETED	-
DEPOSIT	ETH	1	COMPLETED	-
WITHDRAW	TCASH	3	APPROVED	Withdraw Apply

Note: Approve withdraw is done automatically by the program instead of manually. However, all tokens in EtherFlyer platform is stored in the smart contract of cold wallets in order to ensure the safety of user's funds. The hardware cold wallets need to be manually operated to confirm withdraw.

8. Receive TCASH Revenue

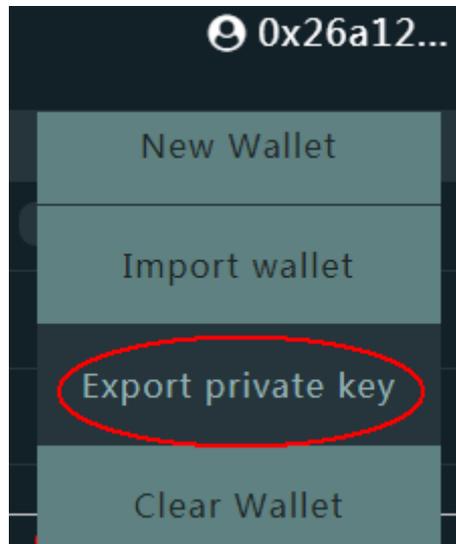

EtherFlyer's TCASH token is a revenue-generating token that TCASH holders can share 50% of the transaction fees on the EtherFlyer platform.

Users use the TCASH-containing wallet to log in to the EtherFlyer Exchange. Click on "Withdraw Apply". In the popup page, you can see the TCASH revenue. Click "Withdraw Apply". After the application is approved, users can withdraw their revenue to wallet.

Revenue will be distributed weekly, users can withdraw any time and EtherFlyer will keep revenue for you.

9. Export the Wallet Private Key

If you want to export the wallet private key, you can click the account avatar, then click Export wallet private key and enter the password to export.

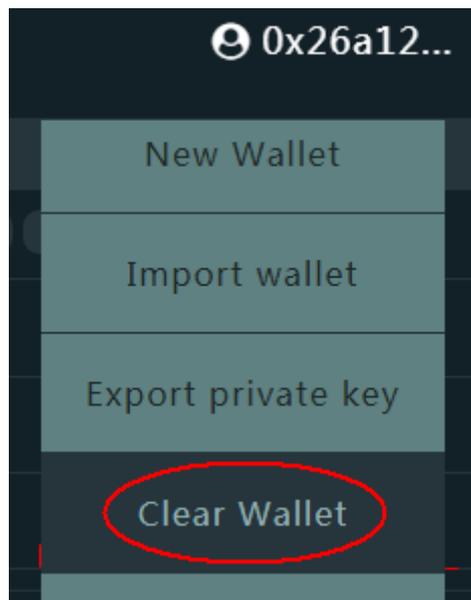

10. Clear the Wallet

If the user wants to clear the wallet on the local computer, you can click the account avatar and click "Clear wallet". Click "YES" in the pop-up dialog box.

Warning: Clear the wallet does not require a password, anyone can clear your wallet

unrecoverable, so you must take good care of the private key. Once the private key lost, no one can help you get back your tokens, including EtherFlyer official.

Disclaimer

EtherFlyer official is completely exempt from any loss of wallet private key due to improper use or save by users.
